

## Four Channels!

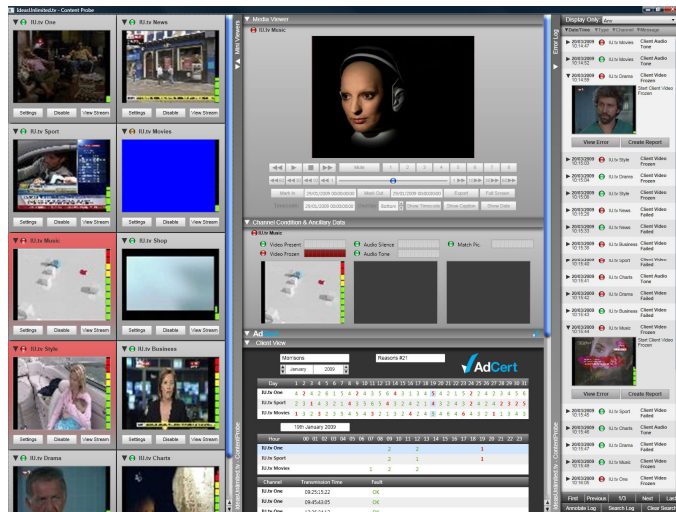

We are pleased to announce the arrival of our four channel **ContentProbe!** Its development is an exciting step for us in our continuing plan to drive down the cost of compliance recording whilst increasing its efficiency. In performance terms we calculate that the new four channel unit will be up to 40% more power efficient than the 2 channel ContentProbe. It will have all the features of the 2 channel systems but still in a 1'U' form. A 4 channel unit has been much in demand and we have already taken orders. We are expecting to begin delivery of them in April. If you are interested in more details or require pricing, please contact Glyn or Cathy (0870 162 7200).

## NAB 2009 – Las Vegas

We may have only just unpacked the flight cases from Broadcast Video Live at Earls Court, London but we are already thinking about what to put in our bags for NAB in Las Vegas (20-27<sup>th</sup> April 09). Mike Stoker is the lucky guy to be heading out there and if you wish to catch him – he will be on **Stand No. SU8904**. He is *going* to Las Vegas but I don't think he's going to be *staying* in... We have some handy advice for you if you are going to the show. If you want to leave Las Vegas with a small fortune, make sure you arrive with a large fortune!

## In with the New!

The new User Interface which we previewed at **Broadcast Video Live** this year has received a very warm welcome. Our design team have listened to your suggestions and produced, what we believe to be, a better looking interface which is intuitive and simple to use. It makes managing the system easy and enables you to monitor hundreds of channels from your desktop quickly and effectively. Not only does it make viewing the channels simple but it also is plainly obvious when a channel is in error.

The new User Interface will be released later in the spring. For customers who have purchased their units since October 2008, the new User Interface will be free of charge and for those wishing to upgrade – there will be a small charge per compliance unit.

## Just Checking!

Attached to this email we are giving you a sheet with instructions on how to install and use the RAID management software. We strongly advise you to use this software because as machines get older – there is the risk that disks will fail! If you need help, please contact our technical department.
